When Will I See Results? Your 12 week guide to your new body.

After two weeks. Your body has started to adjust and is rewarding you with an overall sense of wellness. You may not see substantial weight loss effects at this point, because your body's initial reaction to a new lifestyle is to hoard fat.

After four weeks. Your body will have now adapted to your new lifestyle and you should start losing weight. You may start looking forward to stepping on the bathroom scale again.

After two months. You should start getting comments from your friends about how great you are starting to look. Some may even be jealous! You should now really start to lose weight fast.

After three months. By this point, you may have hit your targeted weight and will be working on maintaining your new beautiful body. This is when you may be writing to us with a testimonial about how AcaiBurn has changed your life for the better.

Frequently Asked Questions

Does The AcaiBurn System Really Work?

The AcaiBurn system has helped thousands of people lose weight and keep it off. Of course, results vary from person to person. The key to losing the most weight possible with the AcaiBurn system is to keep yourself motivated. Our active ingredients were shown in double-blind studies to help people lose weight up to 4.5 times faster than the group given a placebo. Both groups were put on a diet and exercise program, which should be part of any weight loss plan.

How Long Will It Take To Get Results With AcaiBurn?

This varies from person to person. Healthy weight loss is never instantaneous. You don't want to starve yourself when the goal is to look and feel healthy. Dropping weight too quickly can damage your cardiovascular system. Realistically, it will take your body some time to adjust to your new lifestyle. You may start feeling healthier in a matter of days, but it may take a few weeks before your weight loss results become obvious.
